- FFIEC-CAT
- PCI-DSS
- GDPR
- CIS Top 20
- Sox 404
- GLBA
- FERPA
- And many more.

Compliance Simplified

Over the past ten years, compliance, complexity, and the number of regulations have become a major concern for many organizations. The Ignyte Compliance Management module was developed to take the pain out of compliance.

FEATURES

Streamlined Compliance Management

Enter organizational controls into the system once to determine compliance with any regulation. The Ignyte Compliance Management module uses a pre-defined common control set to simplify compliance management.

Automated Controls Mapping

Once organizational controls are defined in the system, the Ignyte Compliance Management system does the rest. As your organization becomes subject to new regulations, they can be automatically mapped to your pre-defined control set to provide an immediate compliance assessment.

Contractual Obligations Monitoring

Security and privacy provisions are increasingly included in legal agreements. Enter security and privacy obligations into the Ignyte Compliance Management module to ensure compliance with contractual obligations.

Robust Dashboards and Reporting

Measure organizational compliance with any regulation or legal agreement through onboard dashboards and reports. Receive email alerts when compliance obligations are at risk.

Seamless Ignyte Assurance Platform Integration

The Ignyte Assurance Platform is a tightly integrated set of modules that are meant to work together to address challenges, such as vendor risk management, policy management, and risk management. Leverage additional modules to enhance the functionality of the Compliance Management module.
